196429014	Energy cost meter for measuring and displaying the energy consumption of connected electrical devices, colour: white

The energy cost meter is plugged between the outlet and the connected electrical device and measures or displays the energy consumption of the electrical device. Rated voltage: 230V~; Current: max. 16A; Frequency: 50Hz; Power display range: 0.1W-3680W; Resolution: 0.1W; Energy consumption display range: 0kWh-9999kWh; Accuracy: ±2%; Cost display range: 0,00-9999€; Setting range: 0.00-99.99€/kWh, colour: white

Technical data	196429014
With display	yes
Display diagonal	52.000
Min. depth of built-in installation box	0.0 mm
Nominal voltage	230
Power consumption	3680 W
Suitable for integration of actuators	no
Suitable for integration of vehicle charging station	no
Type of primary energy	Current
Type of display	LCD
Nominal frequency	50 50 Hz
